

ONUR ATCI

ENGINEERING MANAGER | SENIOR SOFTWARE DEVELOPER

+90 532 151 80 18 | onuratci@icloud.com | linkedin.com/in/onuratci | Ankara, Turkey

PROFESSIONAL SUMMARY

Engineering Manager with over 15 years of experience leading cross-functional teams and delivering scalable, cloud-native solutions. Expertise in microservices architecture, Java, and Golang development, with a proven track record in optimizing complex systems, driving innovation, and enhancing user experiences. Adept at leveraging cloud technologies (AWS) and employing modern software engineering practices to exceed business goals. Seeking to contribute leadership and technical acumen to drive impactful results.

SKILLS

- IDE: IntelliJ Idea, Android Studio, Goland, Eclipse
 - Techs: Spring Boot, Android SDK, JPA, Rest, Soap, Docker, Kubernetes
 - Cloud: AWS Kinesis, EC2, Serverless, RDS, S3, Route 53, ALB,Aurora
- Languages: Java, Golang, Kotlin
 - Databases: Postgresql, ElasticSearch, MongoDB, Redis
 - Project & Source Code Tracking: Jira, Trello, Git, Subversion

EXPERIENCE

- ENGINEERING MANAGER

Getir Perakende A.S

June 2023 - Present

 - Currently working in the Advertising Tech team at Getir, developing a B2B ad management platform for in-app advertising. Focused on building and optimizing ad server and management solutions to enhance campaign performance and user engagement.
 - Successfully led the migration of legacy CRM systems to Salesforce with optimized workflows and added functionalities. This project highlights my role as a Tech Lead and Software Developer, contributing to the optimization and migration of services for enhanced customer functionality.
- LEAD SOFTWARE DEVELOPER

Definex A.S

Dec 2022 - June 2023

 - Anayzed and developed middleware solution for Garanti Bank Turkiye, which can improve 400% development speed and mitigates security risks of transformation projects.
 - As a tech lead, provided consulting for AWS integration for Definex Eartquake Mobile project.
 - Reason for Leaving:** Due to **economic challenges** within the company and the **cancellation of a cloud consulting contract by a key client**, we mutually decided not to continue the engagement.

ENGINEERING MANAGER Huawei A.S

May 2022 - December 2022

- Successfully improved search download conversion rates through the integration of NLP and ML models.
- **Reason for Leaving:** The role was impacted by a **misalignment with the company culture in Turkey**, particularly due to **high turnover rates and frequent handovers**, which hindered long-term team cohesion.
- Employed opensearch KNN algorithms for advanced optimization opportunities, resulting in a 20% increase in search and download rates.

SOFTWARE DEVELOPMENT TEAM LEADER Argela Technologies A.S

February 2019 - May 2022

- Successfully architected and led a team in delivering an on-premises solution for traffic analysis and DPI configuration.
- Deep Package Inspection project highlights my leadership in solution architecture and hands-on Java development for network analysis and security.
- Implemented a subscriber module enhancing real-time authentication data matching and geographic backup.

SOFTWARE DEVELOPMENT MANAGER Comodo Yazilim A.S

July 2017 - January 2019

- Successfully orchestrated the migration and optimization of ITSM services on AWS, ensuring scalability and cost-effectiveness.
- Improved error detection through the efficient indexing of high-volume operating system logs using the Elastic Stack.
- Involved project showcases my expertise in AWS migration, service optimization, and leveraging cloud-native technologies.

SENIOR SOFTWARE DEVELOPER Innova Bilişim A.S

March 2015 - July 2017

- Successfully contributed to the creation of a distributed, active-active redundant system for fraud detection.
- Ensured the prevention of fraudulent calls through real-time analysis and Hazelcast in-memory cache.
- Contributed projects highlights my expertise in fraud detection, distributed systems in a telecom environment and Sip Stack

SOFTWARE ENGINEER Cyberwise A.S

December 2011 - March 2015

- Successfully developed a feature-rich mail web interface and CRM portal.
- Ensured compliance with ETSI standards for email transformation and evidence generation.

- Played a key role in designing a scalable and efficient software architecture.

- Projects reflect my expertise in full-stack development, emphasizing secure email communication and scalable software design.

■ SOFTWARE ENGINEER Basari Mobile A.S

June 2011 - December 2011

- Collaborated closely in a small team to deliver impactful Android solutions.
- Project showcases my proficiency in Android development, emphasizing user-friendly interfaces and secure transaction capabilities.
- Enabled users to effortlessly purchase and access a variety of digital publications.

EDUCATION

■ MASTER OF SCIENCE - MS IN INFORMATION SECURITY Hacettepe University

January 2020

■ BACHELOR OF SCIENCE (B.S IN COMPUTER ENGINEERING Cukurova University

May 2011
